Our company is a pioneer in developing the first sensory coffee in Brasil that combines aromas of super fruits, Amazon herbs, and terpenes in premium coffees.

We aim to bring a unique, 100% natural product that offers a new sensation through a carefully crafted combination.

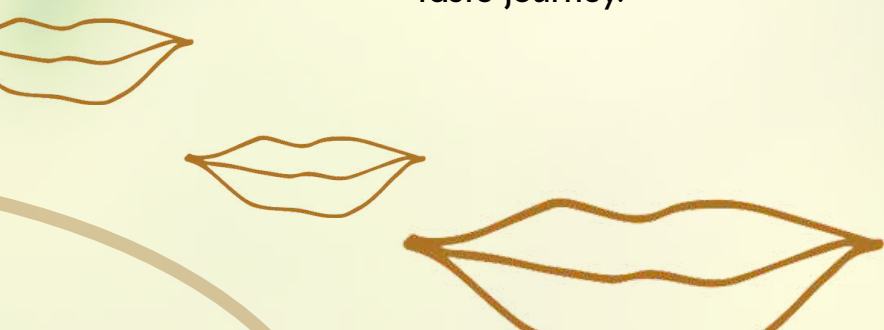

We understand the needs of consumers who want to taste and enjoy a well-known drink, such as coffee, but with something new that replaces the routine of ordinary coffee with new sensations and pleasure. Our coffee brings exactly this proposal, offering a unique and enjoyable experience.

Through extensive research and scientific knowledge, we have selected high-quality ingredients to create a unique blend that awakens the senses and provides a new dimension of pleasure to the palate for every moment of your day.

Our commitment to quality is reflected in every step of the production process. From the careful selection of our suppliers' reputation, quality ingredients to the rigorous production control during the roasting and packaging process, we ensure that each cup of coffee offers the sensory excellence our customers seek.

We are proud to bring an innovative approach to the coffee market, providing consumers with a unique, exciting, and differentiated option.

We invite you to experience our sensory coffee and discover the pleasure of a new and fascinating taste journey.

cbd CAFÉ BLENDS DO BRASIL

Although traditional coffee lovers may have a special place in their hearts for the simplicity of coffee, one cannot deny the allure that sensory cafes have gained among the general public. With a unique blend of aromas and flavors, it has emerged as an exciting and appealing option that is quickly becoming a trend in the coffee world.

A premium coffee with surprising aromas and flavors can be described as a unique sensory experience that combines pleasure, health, and uniqueness for every moment of your day with more revitalization, balance, and relaxation.

Exceptional Flavor: complex and sophisticated resulting from the combination of fruits, herbs and terpenes. These elements blend harmoniously to create a balanced and memorable taste.

Exotic Aromas: they are captivating and exotic, emanating from the coffee, elevating fresh herbal notes to fruity, citrusy and slightly sweet nuances, arousing curiosity.

Pleasure Sensation: with each sip of this sensory coffee, a new sensation of pleasure is provided, a combination of flavors and aromas that results in a gratifying experience for the senses.

Uniqueness: a combination of 100% natural unique ingredients with exclusive aromatic properties, an unforgettable experience.

What are Terpenes?

Terpenes are substances extracted from various parts of plants, including seeds, flowers, leaves, roots, and fruits. They are like the natural 'ingredients' that give plants their smell and taste.

When combined with other ingredients, they enhance their characteristics, bringing an unusual sensory experience and offering numerous benefits.

It is known that there are various types of terpenes and they provide different benefits for both the mind and body and can improve your health.

Similar to how aromatherapy works, inhaling the aroma of certain terpenes is known to enhance emotional well-being.

Terpenes also contribute to:

- Enhance and enrich flavors by creating a new pleasure experience making consumption more enjoyable.
- Unique and pleasant aromas promoting a sense of well-being, freshness, liveliness, and smoothness.
- Aromatic Benefits have the power to influence our emotions, memories, and sensory perceptions.

Our terpenes are naturally extracted from plants and meticulously formulated by reputable companies. They are aromatic plant combinations reminiscent of blends identical to the cannabis flower.

This process is carried out with the aim of preserving the authentic characteristics of the cannabis flower aroma, providing a homogeneous profile that ensures the consistency and unchanged quality of our products.

Product Presentation

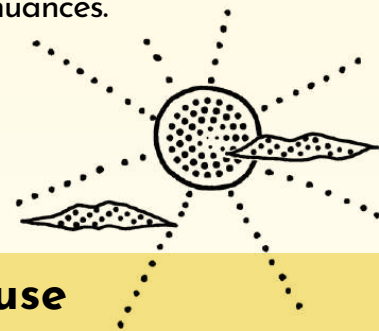

Ground Coffee (500 mg) in box pouch packaging, with elegant and versatile design. Includes side notch for easy opening and internal ZipLock for reclosing after first use. Degassing valve to keep aroma and flavor fresh, naturally releasing carbon dioxide and preventing oxygen from entering.

Ingredients

The Morning Kush formula is composed of special coffees, Mango, Surinam cherry, and Açai aromas, harmonized with an exclusive blend of Amazon herbs. To further enhance the experience, we introduced the Lime Kush terpene, which intensifies both the aroma and the flavor.

This terpene has been meticulously formulated, using natural aromas from various plants to evoke the essence of the cannabis flower and provide a unique olfactory and gustatory sensory experience. Completely natural, it is recognized for its distinctive citrusy note of lime, earthy and spicy nuances.

Directions for use

It is recommended to consume doses of 15g (2 tablespoons) mixed in 100ml of water. Packaging contains 30 doses.

Conservation care

Expiration 12 months from the manufacturing date

AFTERNOON

SUNSET CALIFORNIA

What is it

The Morning Kush Coffee is a perfect combination of our specialty coffees with a 100% natural blend of aromas. A moderate Sensory coffee with a pleasant CITRUS herbal aroma and flavor.

Feature

A medium-roast coffee meant to be enjoyed in the afternoon. An experience of balanced fragrance and acidity.

Benefits

This sensory coffee will catch your attention with its subtle sweet note to **BALANCE** your day with lots of concentration and creativity.

Free from preservatives and dyes; Zero sugar and Zero gluten.
